

Abhay Soni

Full Stack Web Developer & Java Developer

+91 992-830-3363 | devabhaysoni@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Software Engineer and AI Developer with experience in full-stack development, AI-powered automation, and scalable backend systems. Built multilingual AI voice agents, automation workflows, and interactive web applications using React, Node.js, Python, C#, and REST APIs. Skilled in problem-solving, system optimization, and developing maintainable solutions in agile remote environments.

EDUCATION

Arya College of Engineering and I.T.

Bachelor of Technology in Computer Science | SGPA : 9.0 (till 5th sem)

Jaipur, Rajasthan

Aug. 2023 – May 2027

Evolution International School

Class XII (CBSE) | Percentage: 80%

2022 – 2023

EXPERIENCE

TechForce

Game Programming Intern

Remote

Jun 2025 – Aug 2025

- Engineered 3 interactive game modules using Unity 3D and C#, applying OOP principles and modular architecture to improve code reusability by 40% and reduce bug frequency by 30%.
- Developed gameplay systems including player controls, collision handling, UI interactions, and scene management while optimizing runtime performance and frame stability across multiple environments.
- Collaborated within an agile remote team during an 8-week sprint cycle, using Git-based workflows, debugging practices, and code reviews to deliver all milestones on schedule.

PROJECTS

AI-Powered IVR Replacement System | 🗣️ | Python, LLM APIs, Voice AI, NLP, Automation

- Developed an AI-driven conversational voice agent to replace legacy IVR systems using LLM APIs, NLP pipelines, and real-time speech processing for banking and healthcare use cases.
- Engineered hallucination-prevention guardrails, intent validation workflows, and fallback response handling to improve response reliability and enterprise safety compliance.
- Implemented context-aware conversation flows, automated query routing, and voice-based user interaction pipelines to enhance customer support efficiency and accessibility.
- Awarded 2nd Runner-Up among 100+ teams at Hack Arya Verse 2.0 (Mar 2026).

AscendX – AI-Powered EdTech Platform | 🗣️ | React, Node.js, JavaScript, REST APIs, NLP, TTS

- Developed a full-stack AI-powered EdTech platform with multilingual voice narration support across 5+ languages using NLP and Text-to-Speech APIs.
- Designed RESTful APIs and an AI-based quiz generation engine achieving 85% semantic relevance accuracy for adaptive learning workflows.
- Implemented personalized AI course roadmaps through NLP-driven content analysis, reducing reading friction by 40% for 50+ simulated users.

Voice Vista – Voice-Controlled Browser Assistant | 🗣️ | Python, NLP, Speech Recognition, Automation

- Built a real-time voice-controlled browser assistant with sub-200ms command parsing latency using NLP and speech recognition pipelines.
- Integrated browser automation workflows for hands-free navigation, tab management, and voice-triggered web interactions.
- Secured Top 10 position among 250+ national teams at Code-e-Manipal Hackathon 2025.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, C#, JavaScript, HTML, CSS, SQL

Frameworks: React, React Router, Node.js, Express.js, JavaFX, Unity 3D

Developer Tools: Git, GitHub, VS Code, eclipse, Postman, REST APIs, JWT Authentication

Libraries: OpenCV, Framer Motion, Prisma ORM, JDBC, Jest, pandas, NumPy, Matplotlib
